Directors Report:

Ms. Elliot presented her directors report including the Dry Weather and SAT Response to ARWA Request.

Ms. Elliot discussed that the month of July has been extremely dry with several days of Effluent flow averaging below one million gallons per day. Staff has been working to keep the treatment process functioning as it should. The dry weather allowed staff to clean the influent channels before each Mechanical Bar Screen. Staff manually removed approximately two (2) yards of grit and debris from the channels. She reported that grease has been an issue with the low flows, causing a layer of grease on the bioreactors, requiring staff to skim daily. To keep flow moving in the grit chambers a two (2) inch hose was set up to run utility water during working hours.

Ms. Elliot discussed that SAT responded to the ARWA request. The response was attached. Was discussed during the State Hospital Committee Report.

Ms. Elliot presented the Operational Data for July 2022, reporting an average daily influent flow of 2.28 MGD. Average daily effluent flow was 1.13 MGD.

Ms. Elliot presented the rain vs flow chart.

Ms. Elliot presented Anthony Luongo Operations and Maintenance report highlighting the centrifuge inspection by Westfalia, the inspection and replacement of the biosolids and control building air conditioning filters, the cleaning of the bioreactor fans and replacement of belts and aligning of pulley in the biosolids blower room, the cleaning of the clarifier tank and tightening of the conveyor belt on the grit snail system and staff performing camera work for South Abington Township on Bailey and Leach Streets for upcoming road paving.

Mr. Bisignani's report discussed that a deficient response has been provided by South Abington. GHD suggests correspondence or participation in a following-up board meeting to help better explain the need. GHD would be glad to support and participate in a discussion/meeting.

Mr. Bisignani's report discussed they provided feedback on Phase 2 and Phase 3 WIP supplements from GHD. This only impacts ARWA if nutrient credits are purchased pr sold for compliance with TN and TP Cap Loads. Typically pounds of nutrients reductions are converted to credits using the delivery of ratio based on the watershed segment and distance from the Bay. Fewer credits are calculated per pound of nutrient with the new Phase 3 delivery ratios. Since ARWA doesn't purchase credits, there should be no impact to ARWA.
